DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-2, drawn to a method for producing specific antiserum for a universal tumor antigen.

Group 2, claim(s) 3-4, drawn to a method for diagnosing malignant tumors using a specific antiserum against a universal tumor antigen.

2. The methods of Groups 1 and 2 differ in the method objectives, method steps and parameters and in the reagents used.

3. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims are not linked by a special technical features because claims 1 and 2 are obvious over Muraro et al (Cancer Research, 1985, Vol. 45, pp. 5769-5780). Muraro et al disclose a method for making a specific antibody which binds to the universal tumor antigen CEA. Claims 3 and 4 are obvious over Beloglazova et al (Akusherstvo I Ginekologiya, 1995, Vol. 5, pp. 33-44) who disclose a method of detecting gynecological cancers using the "T-G" test. Because the claims are no novel over the prior art, the claims lack a special technical feature, and therefore restriction for examination purposes is proper.

Art Unit: 1642
